

# Mobile

## The Total Mobile Wireless Solution

Now, with a Mobile Solution from 24-7 Hospitality Technology, restaurant orders will be processed easily, quickly and reliably within modern wireless Point-of-Sale software. As orders are jotted down, they can be sent instantly to the kitchen and bar through a Wi-Fi system. The benefits are numerous:

- **Reduced Order Time**

Speedier ordering increases potential number of customers without increasing size of restaurant

- **Increased Order Accuracy**

Accurate order entry impacts table time, customer satisfaction, food loss, and financial reporting

- **Increased Quality of Customer Service**

Servers spend more time in front of customers and less time in front of fixed POS terminals. Customer service improves as needs are met more promptly and service time is reduced

- **Payment Transactions can be made at table**—no need to take credit card out of guest's sight

- **One additional Table-Turn** = 10-30% more sales

24-7 Hospitality Technology offers a number of Mobile devices—from small phones that fit in the palm of your hand to tablet pads that act as a point-of-sale or reporting system.

*Orders can be transmitted directly from the Partnertech OT-110 to the bar or kitchen. Includes 4.3" Widescreen LCD Touch Screen.*

*The DT 430 features a 4.3" outdoor-viewable display in a compact, lightweight package.*

*Partner Tech's EM-220 mobile computer provides a state of the art handheld terminal with multiple functions, including a 10.1" LCD with integrated touch.*

*Touch Dynamic's WF43 delivers enhanced Wi-Fi reliability, power saving technology, and is easy to set up and use.*

*The HP Slate can incorporate a POS case that includes a barcode scanner and magnetic stripe which processes credit cards at the table.*
