

# BYOD

(Bring Your Own Device)

## A New Approach to Mobile

The two biggest stumbling blocks for adoption of Mobile POS has been an extremely high cost of entry and difficulty in getting a mobile solution to work fluidly at the table side. Different approaches have been tried, but not have met with much success, until now...

Now with BYOD your restaurant business can make use of popular devices such as Apple iPhones and iPads, and Samsung Galaxy phones and tablets within a secure network environment.

Mobile POS terminals increase sales and lower costs. Use your own devices to support a Mobile POS solution with the same features of a Fixed POS system. This allows restaurant operators to realize a better ROI on their POS investments.

Servers are able to take more orders; checks are sent to the kitchen without any delays; and the orders are not susceptible to a server's memorization abilities. Mobile solutions can also be utilized for line busting and remote ordering situations — such as ordering drinks for guests waiting on a table, where the wasted time for a server to return to a fixed terminal to enter the order could jeopardize finding the guest with the beverages when they are ready.

If you are interested in learning more about Mobile Solutions or BYOD, contact a 24-7 representative.

### Use popular devices such as Apple iPad and Samsung Galaxy within a secure network.

*“Restaurant mobility has never been easier or safer.”*

**24-7 Hospitality Technology** is working with security vendors VendorSafe™ and SecureConnect™ and its software vendor OnePOS™ to provide easily deployed secure remote access and endpoint control.

### Mobile solution benefits are numerous:

- **Reduced Table-turn Time**  
Increases potential number of customers served without increasing size of restaurant
- **Increased Order Accuracy**  
Impacts table time, customer satisfaction, food loss, and financial reporting
- **Increased Quality of Customer Service**  
Servers spend more time in front of customers and less time in front of fixed POS terminals
- **Payment Transactions can be made @Table**  
No need to take credit card out of guest sight
- **1 additional Table-Turn**  
= 10 - 30% more sales
