24x7 Hospitality Technology Makes Strategic Investment in onePOS LLC Software Solutions

Investment will allow 24x7 Hospitality Technology to better support its mid-to-large size restaurant chain customers with enterprise features they require

St. Charles IL, October 27, 2008 -- 24x7 Hospitality Technology announced today that they have made a strategic investment in onePOS LLC, Orlando, FL, a leading provider of restaurant hospitality software solutions for the full service, quick service, bar/night club, and hotel/resort market places. 24x7 Hospitality Technology (24/7) is a POS technology solutions and support provider specializing in installation, implementation and personalized support and consulting for the hospitality and restaurant industry.

"24x7 Hospitality Technology made this investment because onePOS is the most stable and easiest software to use in the industry. The onePOS management system also links our customers' stores with their accounting systems, providing a total solution," said Kyle Hauser, CEO of 24x7. The investment will allow 24x7 to better support its mid-to-large size restaurant chains with enterprise features they require.

The CEO and founder of onePOS is Travis Young, who has led the development of the software solution. Previously, Mr. Young was the developer of Hospitality Solutions International (HSI) POS software, which has been implemented in over 4000 restaurants, including over 1500 restaurants in the Applebee's chain. His new company, onePOS LLC, has installed over 2,500 restaurants, including over 75 customers in the Buffalo Wild Wings Franchise Group, which are configured, installed and supported by 24x7 Hospitality Technology.

A total management system solution for restaurants

The onePOS system has an all-in-one interface and delivers the tools needed for restaurants to communicate with their kitchens, manage cash, and has credit card processing built-in. "We switched to 24x7 Hospitality Technology to obtain better quality of service, and we have not been disappointed," said Richard Andrews, President/CEO, RAMB Co. LLC, Hudson, Ohio. "I'm currently installing my 8th onePOS location. The equipment and software runs flawlessly, and when we need assistance, it is provided in an expeditious manner," Andrews said.

"The secret of our success is that is that the onePOS software solution is a management system, not just software," said Ms. Hauser. The management system combines sound business practice and technology in a user-friendly approach. The Buffalo Wild Wings Franchisees said they improved profit levels by controlling daily costs and revenues and eliminating duplication work.

About 24x7 Hospitality Technology

24x7 Hospitality Technology provides restaurateurs with a total technology and support solution. Their onePOS software integrates with Aspect Back-Office software, Bullseye Restaurant Controls, and QSR Kitchen Management. For over 35 years, members of the company have supported thousands of systems in the hospitality, hotel/resort and restaurant industries. The company works to provide superior customer satisfaction by providing a total management solution and support 24 hours a day, 7 days a week and 365 days a year.
